### THE SPACE BETWEEN US

#### Plot

Multi-billionaire Nathaniel Shepard, CEO of Genesis, launches the first mission to [colonize Mars](#). During the journey, astronaut Sarah Elliot discovers she is pregnant. She gives birth to Gardner after landing on Mars, and dies from [eclampsia](#); Gardner's father is unknown. Nathaniel keeps Gardner on Mars as a secret; he fears a public relations disaster and returning to Earth could be dangerous to Gardner's health. Gardner is raised by astronaut Kendra Wyndham and the other scientists on Mars.

Sixteen years later, he hacks into a robot he helped build to gain access to his mother's personal belongings. He finds a wedding ring and a video of Sarah and a man in a beach house. Convinced that the man is his father, Gardner determines to find him. In an Internet chatroom, Gardner talks to Tulsa, a street-smart girl from [Colorado](#) living in the foster care system. She believes Gardner is confined to a penthouse due to [osteogenesis imperfecta](#). They discuss their plans for the future and Gardner promises to visit her someday.

Kendra video calls Nathaniel and Genesis director, Tom Chen; she says that Gardner is extremely intelligent and wants him to be allowed to go to Earth. Nathaniel refuses; Gardner would have to have a risky surgery to increase his bone density and train to adapt to Earth's atmospheric pressure. Gardner undergoes the surgery and training against Nathaniel's wishes and boards a shuttle for Earth with Kendra and several other astronauts.

When they arrive on Earth, Nathaniel is angry at Tom who kept Gardner's training a secret. Gardner is quarantined at [NASA](#) while undergoing medical tests to determine his fitness for life on Earth. When the tests show Gardner cannot live on Earth very long, he escapes and finds Tulsa and convinces her to help find his father. They are followed by Nathaniel and Kendra, who try to convince Gardner to return to NASA but he runs away with Tulsa and learns the location of the man who married Gardner's parents, Shaman Neka. Nathaniel and Kendra learn that Gardner's body contains dangerously high levels of [troponin](#), indicative of an [enlarged heart](#), which cannot withstand the atmospheric pressure of Earth; Gardner must be returned to Mars immediately if he is to survive.

Gardner confesses his true origins to Tulsa who does not believe him. They find Neka, who agrees to help them and lets Tulsa use his computer to locate the beach house from Gardner's video. They travel to [Summerland, California](#), stopping in [Las Vegas](#) for fun, where Gardner collapses and is taken to a hospital. X-rays show carbon tubes in Gardner's bones, and Tulsa finally believes Gardner's claims of being born on Mars. Gardner knows he cannot survive on Earth and wants to meet his father before he dies. Tulsa helps him to sneak out of the hospital and they drive to the

beach house; they meet the man from Gardner's video who is Sarah's brother, not Gardner's father. Gardner thinks this is a lie and runs to the sea, telling Tulsa that this is where he wants to die before collapsing.

Nathaniel and Kendra arrive in time to save Gardner with [CPR](#). Gardner asks Nathaniel about Sarah and realizes that Nathaniel is his father. Nathaniel, Kendra, and Tulsa rush Gardner to a [Dream Chaser](#) and launch into orbit, hoping this will stabilize Gardner. Free of Earth's gravity, Gardner is revived.

Soon after, Gardner boards a space shuttle to Mars after sharing an emotional parting with Tulsa. Kendra, who is retiring from active flight status with NASA, adopts Tulsa. Determined to join Gardner on Mars, Tulsa joins Kendra's training program. Gardner is seen back on Mars with Nathaniel.

## Cast

---

- [Gary Oldman](#) as Nathaniel Shepherd
- [Asa Butterfield](#) as Gardner Elliot
- [Carla Gugino](#) as Kendra Wyndham
- [Britt Robertson](#) as Tulsa
- [B. D. Wong](#) as Genesis Director Tom Chen
- [Janet Montgomery](#) as Sarah Elliot
- Trey Tucker as Harrison Lane
- [Scott Takeda](#) as Dr. Gary Loh
- [Adande Thorne](#) as Scott Hubbard
- [Colin Egglesfield](#) as Sarah's brother
- [Gil Birmingham](#) as Shaman Neka
- [Logan Paul](#) as Roger
- Danny Winn as Dr. Cox

## Production

---

In 1999, Universal Pictures and Mike Lobell Productions acquired a screenplay, then titled *Mainland*, about a rebellious teen born on the moon who desired to come to the earth but whose physiology, it was feared, would not be able to survive the transition. After failed rewrites by Allison Burnett ([Autumn in New York](#)), the project was placed on hiatus, as Lobell left Universal for a deal at Castle Rock Entertainment. The project remained unproduced for over a decade.<sup>[[citation needed](#)]</sup>

On March 13, 2014, an industry source revealed that a science fiction-adventure film titled *Out of This World* was in development at [Relativity Media](#), scripted by [Allan Loeb](#).<sup>[2]</sup> Later in August 2014, it was reported that [Peter Chelsom](#), who had previously directed [Hector and the Search for Happiness](#) for Relativity, was hired to direct the film, while Relativity would produce and distribute.<sup>[3]</sup> Southpaw Entertainment's [Richard B. Lewis](#) was attached to produce the film, and also received a "story by" credit.<sup>[3]</sup>

On February 2, 2015, [Asa Butterfield](#) was tapped to play the lead character in the film, a teen who was raised on Mars, and who falls in love with a girl on Earth he has been communicating with. Chelsom and Tinker Lindsay rewrote the screenplay.<sup>[4]</sup> On July 13, 2015, it was announced that Relativity was selling the project to [STX Entertainment](#), in order to reach an agreement with its creditors and avoid having to file for [bankruptcy](#).<sup>[5]</sup> STX produced and distributed the film.<sup>[5]</sup> On July 31, 2015, [Gary Oldman](#), [Carla Gugino](#), and [Britt Robertson](#) joined the cast of the then-untitled film.<sup>[6]</sup> Robertson would play the female lead, a teen girl from Colorado.<sup>[6]</sup> On September 8, 2015,

it was announced that the title of the film would be *The Space Between Us*, and [B. D. Wong](#) and [Janet Montgomery](#) were added to the cast.<sup>[7]</sup> On September 30, 2015, Trey Tucker joined the film to play an astronaut,<sup>[8]</sup> and on October 23, 2015, [Scott Takeda](#) was cast to play a doctor in the film.<sup>[9]</sup>

The actors [Asa Butterfield](#) (20 years old at the time of the film's release) and [Britt Robertson](#) (27 at the time) have a seven-year age gap between them, greater than their respective characters (both of whom are around 16 or 17), which caused controversy, but in an interview Robertson explains that the age difference helped with the dynamic of the relationship between Tulsa and Gardner:

"I don't think Tulsa is really a teenager. She's had to be an adult for a really long time. She's had to take care of herself. She's had to figure out where she's going to live, and pay her mortgage or gas. She thinks like an adult. There's this dynamic where she's almost parenting him in some ways. There's this very specific kind of thing where she's teaching him about the world (saying), 'Get it together, these are people. Why are you doing it this way? Why aren't you being human?' [Our age difference] I think really helps the dynamic. It's not something I really pay attention to."<sup>[10]</sup>

[Principal photography](#) on the film began on September 14, 2015, in [Albuquerque, New Mexico](#).<sup>[9][11]</sup>

Decathlon diving masks were used as ordinary masks for the team that helps the returning astronauts out of the spaceship.<sup>[clarification needed][citation needed]</sup>

[Andrew Lockington](#) composed the film's score, which was released through Sony Music Entertainment.
