

Língua Inglesa

NOME \_\_\_\_\_ 6º \_\_\_\_\_

Vertebrate and invertebrate animals- animals have characteristics to differentiate one from the other. One of these characteristics may be the presence of bones. Vertebrate animals are those that have bones, forming the spine and skeleton. This structure helps to protect the organs and allows these animals to be larger. They are divided into five groups: fish, reptiles, amphibians, birds and mammals. invertebrate animals have no bones. Some species have a soft body, others have a rigid external structure that helps support the body. They can be classified according to where they live, that is, terrestrial or aquatic.

Leia o texto e observe a imagem, depois responda as questões seguintes no seu caderno:

ACTIVITIES

1- Leia o texto e com um marca texto, destaque todas as palavras desconhecidas.

2- Com o auxílio de um dicionário, monte um vocabulário inglês/ português com as palavras que foram destacadas, coloque-as em ordem alfabética.
