

## LÍNGUA INGLESA

ALUNO \_\_\_\_\_ 6º ANO \_\_\_\_\_

### Land animals

They are animals that develop and live on land, without dependence on water to survive, they have pulmonary respiration.

### Aquatic animals

They are animals that develop and live in water, they usually breathe through gills.

### Aerial animals

They are animals that are born on land, usually also develop on land, but throughout their life cycle they acquire pneumatic wings, beaks and bones. They have a set of air bags that work with your lung breathing.
